Bag-on-Valve
Instant Foam Technology

ULTIMATE EFFICIENCY

Dreumex Omnicare's revolutionary Bag-on-Valve Instant Foam Technology provides the lowest costs while it cleans and cares for the hands under all circumstances. All in one system!

In today's world, everyone has less and less time. Also when it comes to visiting the restroom. Research* shows that only 77% of people wash their hands after using the toilet. That makes cross contamination the main cause of disease, with all the associated consequences. Dreumex wondered why we often fail to wash our hands. Research* reveals that laziness, dirty soap, no soap at all or a faulty dispenser are common reasons. On the basis of this knowledge, Dreumex developed the Dreumex Omnicare dispenser with Bag-on-Valve cartridges: a revolutionary system that negates virtually all the reasons for not washing your hands.

Dreumex has already been an active and dominant presence worldwide for more than fifty years in the field of hand cleansing and hand care. It used this experience to develop this extremely efficient dispenser. Dreumex Omnicare brings ultimate efficiency to where it is most needed.

* Studies can be found at www.dreumex.com

Lowest Costs

- Lowest costs per hand wash
- Up to 2,000 hand washes per cartridge
- Each product has its own volume setting from 0.2 ml to 1.5 ml
- Minimal packaging reduces storage space and transport costs

Efficient

- Touch Free sensor delivers the precise amount of soap every time
- Up to 6 x more concentrated Foam Soap
- One dispenser for all products
- New nozzle and valve with every cartridge

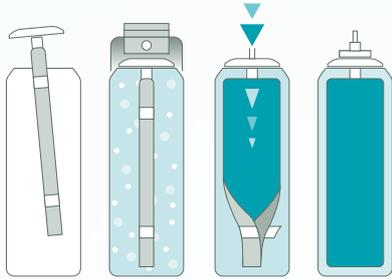

Convenient

- Easy Snap-in cartridges – ready to use
- Long shelf life of cartridges
- First set of batteries, tape and screws included
- On/off, low battery and low soap indicator

Sustainable

- No waste - Cartridge empties 100%
- Minimal preservatives required
- Cartridge is fully recyclable
- Light sensor minimizes energy consumption

BAG-ON-VALVE INSTANT FOAM TECHNOLOGY

- Step 1** Placing of valve and bag inside the cartridge
- Step 2** Crimping of the valve and pressurizing the valve with pure air
- Step 3** Product filling in the bag and weight control
- Step 4** Nozzle placement

Bag-on-Valve Instant Foam Technology

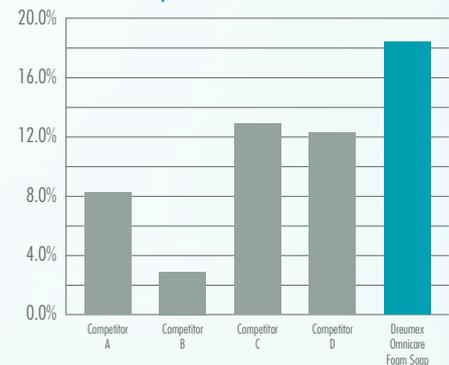

By making use of the Bag-on-Valve Instant Foam Technology, the concentrated soaps are converted, during dispensing, into a rich, firm foam with high cleansing action. The cartridge consists of a laminated bag that is attached to a valve, a cartridge (tin), nozzle and cap. Pure air is injected between the can and the bag, before the bag is filled with soap. This increases the pressure and causes the bag to empty completely.

Only 0.2ml Foam Soap needed to wash hands

Thanks to the Bag-on-Valve Instant Foam Technology and highly concentrated Foam Soap, a dose of 0.2 ml Foam Soap per hand wash is adequate for optimum hand cleansing, whereas other touch free dispensers dose at least 0.4 ml per wash. Therefore 400 ml of soap is enough for 2,000 hand washes. This is more than the typical one liter pack of competitive products.

Usage with a manual dispenser is minimum 2 doses per hand wash. This makes the consumption of soap with some manual dispensers up to 10 times higher than with Dreumex Omnicare.

Dreumex Bag-on-Valve Instant Foam technology: up to 6 x more concentrated Foam Soap

Source: internal research

Power	8 AA batteries included. Life span 1 year or 20,000 doses
Mounting	Invisible using three screws or mounting tape (both supplied)
Materials	Dispenser: ABS plastic Cartridge: tin with laminated bag
Operation	Exclusively touch free Sensor with delay (2 seconds) Adjustable soap dosage: 0.2 ml – 1.5 ml
LED indicator	On/off (green light) Low battery (flashing orange light) Low soap (flashing red light)
Light sensor	Dispenser switches off in the dark to extend battery life
Lock	Dispenser is lockable using removable or permanent key
Service life	Minimum contact with sensitive parts due to touch free system New nozzle with each cartridge
Warranty	1 year standard warranty on the dispenser. Upon registration at www.dreumex.com/warranty, free life-time warranty on dispenser
Sustainability	Cartridge uses pure air to build up pressure Contents used fully 100% of tin waste is recyclable
Range	All current and future products fit in the same dispenser

ultimate efficiency

Foam Soap

Dreumex Omnicare Foam Soap is made with the Bag-on-Valve Instant Foam Technology. Therefore 0.2 ml is more than enough to clean hands thoroughly and hygienically (pH neutral).

Recommended dosage: 0.2 ml

Article Number 00072001 (6 pcs)

Protection Cream

Dreumex Omnicare Protection Cream is a protective barrier cream that should be applied to the hands before work. It forms a protective layer and makes it easier to cleanse the hands. Dreumex Omnicare Protection Cream also has a nourishing effect.

Recommended dosage: 0.8 ml

Article Number 00031008 (6 pcs)

Hygienic Foam

Dreumex Omnicare Hygienic Foam is made with the Bag-on-Valve Instant Foam Technology for circumstances where hand hygiene is extra important. The product has an antibacterial action and helps control the growth of micro-organisms. This product can be used within HACCP plans.

Recommended dosage: 0.4 ml

Article Number 00074001 (6 pcs)

Foam Hand Cleanser

A highly concentrated, extra powerful, foaming hand cleanser made with the Bag-on-Valve Instant Foam Technology. This product is extra strong for cleansing hands which are lightly, medium or heavily soiled with, for example, oils and fats.

Recommended dosage: 1.5 ml

Article Number 00073001 (6 pcs)

Alcohol Spray

Dreumex Omnicare Alcohol Spray is a spray for disinfecting hands when high effectiveness and good skin tolerance are required. The spray kills 99.999% of all bacteria and was tested in accordance with European standards (EN 1040, EN 1276, EN 1500, EN 12791, EN 1275, EN 1650, EN 13624, EN 1275, EN 1650, EN 13624, EN 14348, and EN 14476). Thanks to the use of modern skin conditioners and nourishing ingredients, Dreumex Omnicare Alcohol Spray does not dehydrate the skin. The spray is free from coloring agents and perfume and is suitable for frequent use.

Recommended dosage: 1.2 ml

Article Number 00075001 (6 pcs)

Reconditioning Cream

Dreumex Omnicare Reconditioning Cream is a restorative skin cream that should be applied to the hands after work. The cream ensures a natural recovery and keeps the hands healthy and supple. Dreumex Omnicare Reconditioning Cream protects against the harmful effects of working and weather conditions.

Recommended dosage: 0.8 ml

Article Number 00030016 (6 pcs)

Dispenser

The versatile Dreumex Omnicare dispenser comes standard in an off-white colour. On request a wide variety (minimum quantities apply) of colours can be supplied to make this dispenser fit perfectly in any restroom design. It is also possible to place your own brand or message on the dispenser (minimum quantities apply). All this makes the Dreumex Omnicare dispenser even more versatile.
